20	20	20	20	20

Employee received feed back and training in the proper use and maintenance of the hearing protection device.

Employee Confirmation: _____

Status/Comments: **Mod. to Severe Loss High Freq.**

Status Code: **C**

This code is used for employees with moderate to severe loss of hearing for the high frequencies (3000, 4000 and/or 6000 Hz) and probably only a slight loss at the speech frequencies (500, 1000 and/or 2000 Hz.) This is seen more often for the older employees, or for individuals who have worked around high noise for a number of years. Referral depends on age, history and comparison of hearing for the two ears. In most instances employees with this code describe their hearing as good.

EXAMINATION RESULTS

CURRENT EXAM 8/14/1997

	Left Ear									Right Ear							
Freq. (Hz)	Speech Area			High Frequency						Speech Area			High Frequency				
	500	1000	2000	3000	4000	6000	8000		500	1000	2000	3000	4000	6000	8000		
dB Level	70	70	65	60	60	65	DD		70	70	65	60	60	65	DD		

BASELINE EXAM 8/14/1997

	Left Ear									Right Ear							
Freq. (Hz)	Speech Area			High Frequency						Speech Area			High Frequency				
	500	1000	2000	3000	4000	6000	8000		500	1000	2000	3000	4000	6000	8000		
dB Level	70	70	65	60	60	65	DD		70	70	65	60	60	65	DD		

The Current Exam shows NO STS when compared to the Baseline Exam.

You have been fitted or refitted with adequate hearing protection, if needed, and shown how to use the protection. You are required to wear hearing protection whenever you are exposed to noise on the job and you are advised to wear hearing protection whenever you are exposed to noise off the job.

The Standard Threshold Shift criterion is in accordance with the OSHA regulation 1910.95 "Occupational Noise Exposure".
