

MA 39, MA 40, MA 41 & MA 42

Versatile, Portable Audiometers

Select the model that best suits your needs - from basic air conduction to a combination of air-bone or air-bone-speech to a complete two-channel air-bone-speech audiometer with master hearing aid capabilities.

- Quiet, reliable electronic switches
- Insert phones capability
- Built-in RS232 interface for PC and NOAH compatibility
- Bright, easy to read display screen
- Lightweight, portable soft case

MA 39, MA 40, MA 41 & MA 42

Hard case

Soft case

MA 39

The MA 39 is a portable audiometer that performs quick, accurate pure tone threshold testing.

MA 40

The MA 40 provides pure tone threshold as well as air and bone testing. This unit is NOAH compatible and includes a built-in RS232 interface to transfer data to a computer.

MA 41

The MA 41 is a portable audiometer that provides air, bone and speech testing and has the capacity to drive two free field speakers without an additional amplifier. This unit is NOAH compatible and includes a built-in RS232 interface to transfer data to a computer.

MA 42

The MA 42 provides air, bone and speech testing as well as monaural and binaural master hearing aid testing which makes it ideal for hearing aid fitting and dispensing. It includes separate insert phone jacks, CD/tape input, monitor speaker and monitor headset. Powerful built-in amplifiers provide ample power to connect directly to your speaker system and save you the expense of buying external power amplifiers. This unit is NOAH compatible and includes a built-in RS232 interface to transfer data to a computer.

With the master hearing aid you can select four commonly used frequency slopes to approximate hearing aid acoustics and let your patients experience the difference hearing aids can make.

If air-bone-speech is air-bone-speech... why pay thousands more?
